## SOLID POLY TRAILER SLIKS

<b>#SOLS-2</b>	2 3/8" x 47" Black Poly Slik
----------------	------------------------------

## REQUIREMENTS:

Boats under 2,000 pounds: single line of Slik Strips, butted end to end on the bunks directly under the boat.

Boats over 2,000 pounds: double strips or Solid Slik.

TS series is recommended for use on riveted aluminum hulls.

## DETERMINING THE NUMBER OF STRIPS NEEDED:

Add the length of the part of both bunks that the boat rests on. Order the kit that meets this requirement for the number of bulk strips. (Be sure to double this for boats over 2,000 pounds.)

- UV inhibited Poly Pro combined with silicon for a lasting super "slik" surface
- For all boats...aluminum, fiberglass and wood
- Easily installed over carpeted or bare bunks
- Complete with special stainless steel screws

**3-year guarantee against breakage**

## CAUTION!

After installation, do not unhitch your boat from the trailer until you are absolutely, positively ready to launch.
